GMS Climate Strike

The GMS Magnet had our own Climate Strike Action on September 20, 2019, where we talked about the environmental issues and showed part of the documentary about Greta Thunberg. The following day GMS participated in the World Beach Cleanup day alongside a non profit organization Zer0 Debris. The following weekend GMS also participated in the Sierra Club hike and fundraiser where we participated to help raise \$25,000 for environmental causes.

Linked Learning

GMS Magnet is a Linked Learning-certified program. Linked Learning is a successful approach to education based on the idea that students work harder and dream bigger if their education is relevant to them. The Linked Learning approach integrates these four components:

- Rigorous academics that meet college-ready standards
- Career-based learning in the classroom
- Work-based learning in professional settings
- Supports to help students stay on track

Research shows that Linked Learning students have higher rates of engagement and higher graduation rates than their peers at traditional high schools. This approach is helping to create a disciplined, prepared, and productive future workforce, ready to succeed in college, career, and life. For more info visit: LinkedLearning.org
